

SIL

SUPPORTED INDEPENDENT LIVING

MHS specialises in providing superior care for complex and high needs NDIS participants. Our homes are tailored to the needs of our clients and are supported by highly experienced registered nurses, and fully accredited support workers.

All MHS employed support workers are chosen and trained with the participant's needs in mind. This means at least 2-years' experience in the client's specific disability. All must have a minimum Certificate III in Disability and full accreditations like CPR/First Aid, PEG Feeding, NDIS worker screening check and orientation as well as COVID training.

All MHS homes are chosen and modified to ensure our participants are comfortable and happy. They are also situated close to public transport, cafés, shops and nature walks making it easy to enjoy an active and full life.

MHS spends significant time and resources in creating enjoyable and fulfilling programs for participants. We frequently hold events and host various activities ensuring all participants enjoy social gatherings and spend time with family.

MHS ensures strict adherence to our compliance obligations with regular staff training and spot checks on all houses. We also provide all stakeholders full transparency over the home and care of their loved ones.
